TI Pro v5.6.104 Release Notes

What we've been up to on the journey of providing the best market tools in the world.

**Changes in Version 5.6.104, since the release 5.6.88:**

🔥 New Features 🔥

TradeWave Indicator
- *A new trading system with clear, visual trading signals!*
- *Useful on intraday and longer-term charts!*
- *Learn more in our Trade Wave User Guide!*

Vertical Chart Scaling & Panning
- *Users can now adjust the vertical scaling of charts by clicking and dragging the y-axis up and down. Drag the price axis down to shrink and up to expand.*
- *Users can also click and drag the chart itself to pan across the viewable area.*

💪 Improvements 💪

- Updated tree maps now change their appearance by the selected sort filter
- TradeWave enhancements for better legibility
- Adjusted the symbol lookup fields to ensure they don't steal focus from the charts and interfere with mouse wheel scrolling
- Consolidated AI risk management approaches (Conservative, Moderate, Aggressive) into a single unified approach to maximize performance and clarity.
- AVWAP chart settings now persist for a symbol when switching between symbols on that chart.

🐛 Bug Fixes 🐛

- Fixed a bug that prevented the Symbol Lists window from saving new locations as part of the layout.
- Fixed a bug that caused price alerts, for certain users, to not reset as expected when changing levels through charts
- Fixed a bug that caused executions to not display correctly on charts
- Fixed a bug that caused entry markup to disappear after refresh
- Fixed a bug that caused certain PnL-related data points to be mismatched within Brokerage Plus

- Fixed a bug that allowed a user to submit an order through before the broker connection was complete, leading to an error.
- Fixed a bug that occasionally mislabeled the account column in the positions tab of Brokerage Plus
